

**“The Non-Traditional Business Owner
and the Traditional World of Business.”**

**At the next FREE Biz @ 9” Meeting.
Monday, June 2, 2008, 9 am to 11:30 am**

How are people with severe physical or mental disabilities successful in business today?

Why is unemployment by the disabled increasing; yet self-employment by the disabled continues to rise?

Where the business programs and opportunities are for the disabled and disabled (service-connected and non-service-connected) veterans.

This is the Meeting no one in Vocational Rehabilitation should miss, as it will cover those questions you always had or wondered about, and show you...

- **Why self-employment is an under-utilized vocational rehabilitation tool that can create greater successful employment outcomes, cost-effectively.**
- **The truth about the challenges of starting a business by the disabled.**
- **Why most people with disabilities – using VR services – will not succeed in business, and how to mitigate this.**
- **Why most business consultants and advisors, and business organizations and government agencies are unable to help someone with a disability in their self-employment goals or plan.**

For the enterprising person with a disability, you will receive information that will shock and maybe upset you, but valuable, needed information to better be prepared for the world of business. You will discover...

- **How to qualify and get funding for your business.**
- **How to compete in the non-disabled, traditional world of business.**
- **How to use your disability as a competitive advantage in business.**
- **How to write a winning business plan simply and quickly.**
- **Where to get customers for your business.**
- **How to go into business and (possibly) never lose benefits.**

At this month’s “Biz @ 9” meeting, you will learn about the insider’s tips and tricks about successful self-employment with a disability, from someone who has been there, and has helped thousands of entrepreneurs with disabilities.
